Sub Name :- Marketing Management

In - House Seminar. on

Seminar Topic :- channel design decisions

Name :- Ankita, R. Patel

class :- M.com Ist year

Roll No :- 02

Date :- 18/03/2021

Guidance by :- Prof. S. A. Deshpande

Reg No :- MC201802

Time :- 10:30 to 4pm

* channel design decisions : →

To design a marketing channel system marketers has to follow following steps : →

1. Analyze customer needs and wants.
2. Establish channel objectives and constraints
3. Identify major channel alternatives
4. Evaluating major channel alternatives.

1. Analyze customer needs and wants : →

Consumer may choose the channels they prefer based on price, product assortment & convenience as well as their own shopping goals [economical, social or experimental] Marketers must be aware that different consumers have different needs during the purchase process

The customers increase prefer faster delivery channels degree to which the marketing channels and add on services provided by the marketing channel.

Market channel designer must know all the customer needs and wants while making channel designer decisions.

2. Establishing objectives and constraints : →

Marketer should state their channel objectives in terms of services output level and associated cost and support levels. under competitive conditions, channel member should average their functional tasks.

to minimise costs and still provide desired level of the services.

channel objectives vary with product characteristics, company characteristics, middlemen characteristics, competitive characteristics and environmental characteristics.

i) Product characteristics :-

⇒ Perishable product requires more direct marketing because of dangers associated with delay and repeated handling.

⇒ Bulky products such as building materials or soft drinks requires channels that minimise shipping distance.

⇒ Non standardised products such as custom built machinery are sold directly by sales representatives.

⇒ High unit value products are often sold through company sales force ex - generators of turbines.

ii) Company characteristics :-

It plays an important role in channel design. The company channel design is affected by its long run objectives, resources, product mix and marketing strategy.

iii) Middlemen characteristics :-

channel design reflects the strengths and weakness of different types of intermediaries in handling various tasks.

for ex: Manufacturer representatives are able to contract

customer at a low cost because the total cost is shared by several clients but the selling efforts per customer is less intense than if the company sales representatives did the selling.

iv) Competative characteristics: →

channel design is influenced by the competitors channels. the producer may want to compete in or near the outlets covering the competitive products in other cases company may avoid the channels used by competitors.

3). Identify major channel alternatives: →

Each channel from sales forces to agents, distributors, dealers, direct mail, telemarketing and Internet has unique strength and weakness.

Salesforce can handle complex products and transactions but they are expensive. The internet is inexpensive but may not be as effective with complex products. distributors can create sales, but the company loses direct contact with customers.

* The channel alternatives differ in three ways: →

> The type of Intermediaries.

> The number of intermediaries needed.

⇒ Exclusive distribution.

⇒ Selective distribution.

⇒ Extensive distribution.

> Terms and responsibilities of each.

4) Evaluating major channel Alternatives : →

Suppose a producer identified several channel alternatives and want to determine the best one. Then each channel alternatives need to be evaluate against economic, control and adoptive criteria.

i) Economic criteria : →

Each channel alternatives will produce a different level of sales and costs.

ii) control criteria : →

Using sales agency can pose a control problem. a sales agency is an independent business firm seeking maximizing its profits.

iii) Adoptive Criteria : →

Each channel involves some duration of commitment and lose flexibility. a manufacturer taking a sales agency might have to offer a 5 years contracts.

Capitalisation

Capitalisation Definitions :-

- Guthman and Deugall defines "Capitalisation of a corporation is the sum of the par value of stock and bonds outstanding."

Capital :-

- 1) In Accounting Terminology :- Capital represents excess of assets over the liabilities of the business.
- 2) In Economic Sence :- Capital represents accumulated wealth used to produce additional wealth.
- 3) In Business Sence :- Capital represents the total wealth of the company. In other words it refer to total investments of money in tangible assets and Intangible Assets.

1) THEORIES OF CAPITALISATION

First of all we have to estimate how much amount of capitalization is required to start a company or any business organization. It is known as capitalization value of the company.

Capitalisation is based on two theories:-

- 1) Cost Theory of capitalisation
- 2) Earnings theory of capitalisation

1) Cost Theory of Capitalisation :-

It is simple theory of capitalisation.

Under this method estimation of capital is made on the basis of cost of investment to be made in

- a) Fixed Assets
- b) Current Assets
- c) Other organization expenses to be incurred.

ADVANTAGES :=

- 1) It is simple and easy to understand.
- 2) It is more useful in case of newly established companies because it helps the promoters to know exactly how much amount of funds to be raised.

- 3) It is more suitable to new companies because the earning capacity of the newly started companies cannot be determined initially.
- 4) It is realistic because the cost theory represents the true value of the organization.

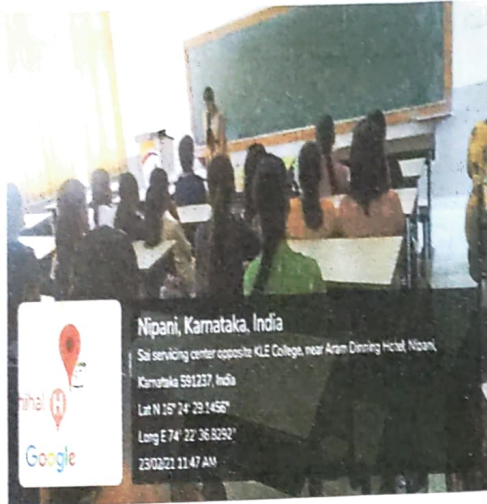

DISADVANTAGES :-

- 1) This method is not suitable for a going concern.
- 2) Ventures that are large need varieties of assets in different departments. Their organization structure itself is complex.
- 3) It is not satisfactory because this theory ignores the earning capacity of business.
- 4) This method is unscientific. Capital is raised on the basis of cost of assets at the time of promotion of company.

1. If $2^{x-1} + 2^{x+1} = 1280$, find the value of x.

$$\begin{aligned}2^{x-1} + 2^{x+1} &= 1280 \\2^x \cdot 2^{-1} + 2^x \cdot 2 &= 1280 \\2^x \left(\frac{1}{2} + 2\right) &= 1280 \Rightarrow \left(2^x \left(\frac{5}{2}\right)\right) = 1280\end{aligned}$$

$$2^x = 1280 \times \frac{2}{5}$$

$$2^x = 512$$

2. A and B together can complete a piece of work in 4 days. If A alone can complete the same work in 12 days, in how many days can B alone complete that work?

let that work = W

work done by A alone in one day = $\frac{W}{12}$

let work done by B alone in one day = $\frac{W}{n}$

total work done by A & B in one day = $\left(\frac{W}{12} + \frac{W}{n}\right)$

As no of days to complete the work by A & B together = 6

$$\left(\frac{W}{12} + \frac{W}{n}\right) 6 = W$$

$$\left(\frac{1}{12} + \frac{1}{n}\right) 6 = 1$$

$$108 = 3^2 \times 2^2$$

$$2100 = 2^2 \times 5^2 \times 3 \times 7$$

$$\text{L.C.M} = 2^3 \times 3^3 \times 5^2 \times 7 = 37800$$

Seminar Topic : General Unethical Practices in workplace
 Name : Madhuri Kadapure
 Class : M.Com II Sem
 Date : 19/03/2020
 Time : 11.30-12.30pm
 Seminar Guide : Prof. P R Kamate

Workplace Ethics

- Workplace ethics are a dynamic set of values that vary with people and their definition of a workplace. For some, it is a physical office they go to every day, while others, their home office.
- It doesn't matter whether you work from home or commute to work everyday, workplace ethic is required to build a successful career. Organizations are known to embrace ethical practices and behaviors to increase productivity and uphold integrity—while setting a penalty for workers who default workplace ethics.

- Workplace ethics are the set of values, moral principles, and standards that need to be followed by both employers and employees in the workplace. It is the set of rules and regulations that need to be followed by all staff of the workplace.
- These ethics are implemented by employers to foster both employee-employee relationship and employee-customer relationships. An organization may decide to put these ethics into writing or not—they are however meant to be followed.

Examples of Ethical Behaviors in The Workplace

- Examples of ethical behaviors in the workplace includes; obeying the company's rules, effective communication, taking responsibility, accountability, professionalism, trust and mutual respect for your colleagues at work. These examples of ethical behaviors ensures maximum productivity output at work. And could be pivotal for career growth.

Obey The Company's Rules & Regulation

- At the start of an employee contract, companies may need the employee to sign various documents, including the company rules and regulation agreement form. Also, the employee may be given a handbook that may serve as a guide.

Communicate Effectively

- Effective communication is very important to avoid misunderstandings when dealing with issues in the workplace. Communicating effectively may mean different things to people at different points in time.

Develop Professional Relationships

- Good professional relationships are not only a thing that fosters teamwork among employees, but also help with individual career development for employees. Developing professional relationships with coworkers or other professionals outside the workplace will also directly or indirectly improve productivity.

Take Responsibility

- It is important for employees to always take responsibility for decisions made both individually and in a team. This is, in fact, a leadership trait that every employee who is looking to take up a managerial position in the future should exhibit.

Professionalism/Standards

- There are professional standards that everything an employee does in the workplace. The use of informal words in a formal workplace is highly unprofessional.
- These standards should be held high and applied to every part of an employee's activity in the workplace. This should include the way they speak, kind of work they deliver and their relationship with coworkers and customers.

Be Accountable

- Accountability is also a very good trait of an employee. One of the things that may short change a talented and responsible is the lack of accountability.
- Lack of accountability may result in your boss thinking you have an "I don't care attitude" to the company's project or worst take you as a liar and may lead to job loss in the long run. For example, at the beginning of each year, a certain amount of money is allocated to each department.

Uphold Trust

- An employee should not do anything that may make his or her employee withdraw trust. As an employee of a company, your employee trusts you to get work done perfectly on time

Thank You

Seminar Topic : Meaning, Features of Companies

Name : Aarushi Rangole

Class : B.Com I Sem

Date : 15/06/2019

Time : 9.15-10.15

Seminar Guide: Prof. B M Hiremath

Meaning and Definition of Companies

- A company is a body corporate or an incorporated business organization registered under the companies act. It can be a limited or an unlimited company, private or a public company, company limited by guarantee or a company having a share capital, or a community interest company.

- A business entity which acts as an artificial legal person, formed by a legal person or a group of legal persons to engage in or carry on a business or industrial enterprise.

Features & Characteristics Of A Company

- **Incorporated association:** A company comes into existence when it is registered under the Companies Act (or other equivalent act under the law). A company has to fulfil requirements in terms of documents (MOA, AOA), shareholders, directors, and share capital to be deemed as a legal association.

- **Artificial Legal Person:** In the eyes of the law, A company is an artificial legal person which has the rights to acquire or dispose of any property, to enter into contracts in its own name, and to sue and be sued by others.

- **Separate Legal Entity:** A company has a distinct entity and is independent of its members or people controlling it. A separate legal entity means that only the company is responsible to repay creditors and to get sued for its deeds. The individual members cannot be sued for actions performed by the company. Similarly, the company is not liable to pay personal debts of the members.

• **Perpetual Existence:** Unlike other non-registered business entities, a company is a stable business organisation. Its life doesn't depend on the life of its shareholders, directors, or employees. Members may come and go but the company goes on forever.

• **Common Seal:** A company being an artificial legal person, uses its common seal (with the name of the company engraved on it) as a substitute for its signature. Any document bearing the common seal of the company will be legally binding on the company.

• **Limited Liability:** A company may be limited by guarantee or limited by shares. In a company limited by shares, the liability of the shareholders is limited to the unpaid value of their shares. In a company limited by guarantee, the liability of the members is limited to the amount they had agreed upon to contribute to the assets of the company in the event of it being wound up.

EQUITY FUND

Introduction :-

An equity fund is a mutual fund that invests principally in stocks. It can be actively or passively (Index fund) managed. Equity funds are also known as Stock funds.

Stock mutual funds are principally categorized according to company size, the investment style of the holdings of the portfolio and geography.

Meaning :-

As the name indicates, these mutual fund schemes primarily invest in equity stocks i.e. shares of companies traded on the stock exchange.

Equity funds can be further divided into large cap funds, Diversified equity funds, mid cap funds, Small cap funds, Sector Specific funds, ELSS tax Saving Schemes, etc.

Equity funds aim to generate high returns by investing in the shares of companies of different market capitalization. They generate higher returns than debt funds or fixed deposits. How the company performance results in profit or loss decides how much an investor can make based on his share holdings.

Features of Equity Funds :-

(a) 80C tax Exemption :-

ELSS is the only tax saving investment under Section 80C of the Income tax act that gives you equity exposure with its shortest lock in period 3 years, and high return potential. ELSS has a good track record. You can invest in small but regular installments or a lumpsum as per your affordability.

(b) Cost of Investment :-

The frequent buying and selling of equity shares often impacts the expense ratio of equity funds. Currently SEBI has fixed the upper limit of expenses ratio at 2.5% for equity funds and is planning to reduce it further. A lower expense ratio, of course, translates into higher returns of investors.

(c). Holding Period :-

When you redeem units of equity funds, you earn capital gains. These capital gains are taxable in your hands. The rate of taxation depends on how long you stayed invested in equity funds. Such a period is called the holding period.

(d) Cost - efficiency and diversification :-

By investing in equity funds you can get exposure to a number of stocks by investing a nominal amount.

Benefits of Investing in Equity funds :-

- (i) Expert money management
- (ii) Low cost
- (iii) Convenience
- (iv) Diversification.
- (v) Systematic investments.
- (vi) Flexibility
- (vii) Liquidity.

The major benefits of investing in equity funds is that you don't need to worry about choosing stocks and sectors to invest in. Successful equity investing requires a lot of research and knowledge. You need to dig deep into the financial of a company before you invest in it.

Seminar Topic : VALUATION OF GOODWILL
 Name : Rohini Miraje
 Class : B.Com III Sem
 Date : 21/08/2018
 Time : 8.15-9.15 am
 Seminar Guide : Prof. P R Kamate

VALUATION OF GOODWILL

- ❖ Meaning and Definition
- ❖ FEATURES OF GOODWILL
- ❖ NEED FOR VALUATION OF GOODWILL
- ❖ FACTORS AFFECTING THE VALUE OF GOODWILL
- ❖ TYPES OF GOODWILL
- ❖ METHODS OF VALUATION OF GOODWILL

Meaning and Definition

- Goodwill means good name or fame or reputation of the company which attracts more customers to earn more profits. Goodwill is one of the assets of a business. Goodwill contributes to the profit earning capacity of the company.

Meaning and Definition

- According to the Institute of Chartered Accountants of India, "Goodwill is an intangible asset arising from sound business connections or trade name or reputation of an enterprise".

Meaning and Definition

- Goodwill may be defined as "the present value of firm's anticipated excess earnings".
- In the words of Spicer and Pegler "Goodwill may be said to be that element arising from the reputation, connection or other advantage possessed by a business which enables it to earn greater profits than the return, normally to be expected on the capital represented by the net tangible assets employed in the business".

Meaning and Definition

- According to Kohler "Goodwill is the current value of expected future income in excess of a normal return on investment in net tangible assets".
- Goodwill may be defined as "an extra value attached to and established business beyond the intrinsic value of the net assets arising from reputation, trade name, sound connections, high profit earning capacity of the business and the same profitability will be continued in future despite a change in the ownership of the business".

FEATURES OF GOODWILL

- Goodwill is an intangible asset but not fictitious asset.
- Goodwill helps the business to increase the profit earning capacity of the business.
- It helps the business to earn more than the normal profits.
- Goodwill is not separate from other assets. So it cannot be sold separately. However, it can be sold with the whole business of an enterprise.
- The value of goodwill fluctuates from time to time depending upon the changing circumstances which may be either internal or external to the business.

FEATURES OF GOODWILL

- Goodwill is created on the basis of different factors such as location of the business, management, functioning of the business, sound connections and so on.
- Indian Accounting Standard-10 states that only purchased goodwill should be recognized in the accounts of the enterprises.
- The value of goodwill does not depend upon the money invested and expenses incurred on building up of the same.
- Valuation of the goodwill is not objective but it is subjective and also differs from one valuer to another.

NEED FOR VALUATION OF GOODWILL

- When the business of one company is sold to another company.
- When the business of a company is taken over by another company e.g., in case of amalgamation or absorption.
- When the company's shares are not quoted on the stock exchange and their value is to be determined for the purposes of estate duty and wealth tax etc

NEED FOR VALUATION OF GOODWILL

- When a person wants to purchase a large block of the company's shares with a view to acquire control over the management of the company.
- When the business of the company is being taken over by the Government.
- When the Management wants to write back goodwill which it wrote off earlier to reduce or eliminate the debit balance in the profit and loss account.

FACTORS AFFECTING THE VALUE OF GOODWILL

- Efficient management team
- Effective advertising campaign
- Loyal, efficient and sincere employees
- Trade mark, patents etc, owned by the enterprise
- Regular research and developmental activities

FACTORS AFFECTING THE VALUE OF GOODWILL

- Good relation with other industries, suppliers, etc
- Strategic location of business premises
- Sufficient number of outlets and service centers for the products
- Training programmes for employees at various levels
- Good name and reputation in the general public
- Proper planning in tax matters
- High quality and reliability of products

FACTORS AFFECTING THE VALUE OF GOODWILL

- Favourable government rules and regulations
- Absence of competition
- Existence of full or partial monopoly
- Good and sound public image
- Earning capacity of the business

TYPES OF GOODWILL

- **Purchased goodwill:** The purchased goodwill is one which arises when one enterprise purchases the business of another enterprise.
- In this case, if the purchase consideration payable is more than the value of net assets, such excess amount is known as goodwill.
- $\text{Cost of goodwill} = \text{Purchase price} - \text{Net assets purchased}$
- $\text{Net assets} = \text{Total assets} - \text{outside liabilities}$
- The purchased goodwill is recognized by the Indian Accounting Standard-10. Hence, it is shown in the balance sheet of a purchasing company.
- The factors such as reputation of the business, trade name, sound connections, financial advantages, etc will contribute to the value of purchased goodwill

TYPES OF GOODWILL

- **Non-purchased goodwill:** Non-purchased goodwill is one which is generated by the business enterprise itself internally. Since this goodwill is self-generated no costs can be placed on it. This goodwill is not shown in the balance sheet of the enterprise. The factors such as efficient management, strategic location, high quality products, public image, etc will contribute to the value of goodwill. Non-purchased goodwill is also known as inherent or self-generated goodwill

METHODS OF VALUATION OF GOODWILL

- Average profits method
 - Simple average profit method
 - Weighted average profit method
- Capitalization of average profit method
- Super profits method
 - Purchase of super profit method
 - Sliding-scale valuation of super profit method
 - Annuity method of super profit
 - Capitalization of super profit method

Average profits method:

- **Simple average profit method:** According to this method goodwill is valued on the basis of a certain number of years' purchase of the average profits of the past given number of years.
- $\text{Average simple profit} = \frac{\text{Total profit of given number of years}}{\text{Total number of years}}$
- $\text{Value of Goodwill} = \text{Average simple profit} \times \text{No of years of purchase}$

Average profits method:

- **Weighted average profit method:** According to this method the value of goodwill is the number of years purchase of the weighted average profit.
- $\text{Weighted average profit} = \frac{\text{Total product of weighted profit}}{\text{Total number of weights}}$
- $\text{Value of goodwill} = \text{Weighted average profit} \times \text{No of years of purchase}$

$$98 = 11 + (n-1)3$$

$$98 = 11 + 3n - 3$$

$$98 = 11 + 3 = 3n$$

$$n = 30$$

$$S_n = \frac{n}{2} (2a + (n-1)d)$$

$$= \frac{30}{2} (22 + (29)3)$$

Q.1: What is the least value must be assigned to * so that no. 197*5462 is divisible by 9.

→ * value is 2

$$\text{BCZ } \Rightarrow \frac{197\cancel{2}5462}{9} = \frac{2191728}{9}$$

∴ the least value must be 2 //

Q.2: Three cars A, B, C started from the same point at 5pm, 6pm and 7 pm resply. & travelled at uniform speeds of 60km/hr, 80km/hr and xkm/hr in the same direction. If all the three met at another point at same instant during their journey then what is x?

a) 120 b) 110 c) 105 d) 100

Ans:

A started at 5pm and he travelled 60km/hr.
B started at 6pm and he " 80km/hr.
C " at 6pm and he " 120km/hr.

$$\therefore x = 120 \text{ km/hr}$$

BCZ, $60t = 80(t-1) = x(t-2)$

$$60t = 80t - 80 = xt - 2x \Rightarrow 4x - 2x = 60t$$

$$\Rightarrow 2x = 60 \times 4 \Rightarrow \boxed{x = 120}$$

Introduction

Leaf is a flat, green, photosynthetic organ that is attached to the stem of the plant. It is the primary site of photosynthesis and transpiration. The leaf is composed of the epidermis, mesophyll, and vascular bundles.

Structure of Leaf

The leaf is a flat, green, photosynthetic organ that is attached to the stem of the plant.

The leaf is composed of the epidermis, mesophyll, and vascular bundles.

The epidermis is the outermost layer of the leaf, which is covered by a waxy cuticle.

The mesophyll is the middle layer of the leaf, which is responsible for photosynthesis.

The vascular bundles are the transport tissues of the leaf, which carry water and nutrients.

Fruit

In botany, a fruit is the seed-bearing structure in flowering plants (also known as angiosperms) formed from the ovary after flowering.

Fruits are the means by which angiosperms disseminate seeds. Edible fruits, in particular, have propagated with the movements of humans and animals in a symbiotic relationship as a means for seed dispersal and nutrition; in fact, humans and many animals have become dependent on fruits as a source of food. Accordingly, fruits account for a substantial fraction of the world's agricultural output, and some (such as the apple and the pomegranate) have acquired extensive cultural and symbolic meanings.

In common language usage, "fruit" normally means the fleshy seed-associated structures of a plant that are sweet or sour, and edible in the raw state, such as apples, bananas, grapes, lemons, oranges, and strawberries. On the other hand, in botanical usage, "fruit" includes many structures that are not commonly called "fruits", such as bean pods, corn kernels, tomatoes, and wheat grains. The section of a fungus that produces spores is also called a fruiting body.

Groups of Fruit: Simple, Aggregate and Multiple Fruit (With Diagram)

In this article, we propose to discuss the three groups of fruit. They are:

- (1) Simple Fruits
- (2) Aggregate Fruits and
- (3) Multiple or Composite Fruits.

The stimulus of fertilization not only develops ovules into seeds but also brings about other changes in the flower and even in the inflorescence.

Usually, all the parts of the flower except the ovary wither away. The ovary begins to enlarge simultaneously with the development of the seed and ultimately becomes the fruit. These changes usually involve a copious development of succulent parenchyma within the ovary.

Student Project Report

A Polite survey on Sanitation Facilities and its Operational Problems: Emagarni and Gawani Villeges of Chikodi Taluka of Belagavi District.

Introduction

Today govt., has given more importance to the rural development through various development programmes. Among them the swachh Bharat Mission was launched on 2nd October 2014 on the birthday of Mahatma Gandhiji. Under this scheme, both urban and rural areas are to be brought open defecation free by 2019. Ghandijjis views and Practicing the sanitation programmes and awareness are relevant to the modern days in sustainable development. Keeping these views in mind this paper is prepared to analysis the Gandhian views on sanitation in rural India.

Objectives

This study has the following objectives

1. To know the views on rural sanitation
2. To study the trends in the construction of toilets
3. To analyse the operational status of Individual Household Latrines
4. To draw the suggestions for proper use of latrines

Research Methodology

Two villages of Chikkodi taluka in Belagavi District were covered under the study. First one is Yamagarni village located on the bank river Vedaganga which has sufficient water supply. The second one is Gavani village which is located in the Rainfed area with insufficient water supply. 50 households were selected from each village through equal proportionate random sampling method which constitutes total 100 respondents. The tools such as tables and percentage method were used for data analysis.

Views on Sanitation

Importance of Cleanliness

Mahatma Gandhi said "Sanitation is more important than independence". He made cleanliness and sanitation an integral part of the way of living. His dream was total sanitation for all. Cleanliness is most important for physical well-being and a healthy

environment. Mahatma Gandhi said, "I will not let anyone walk through my mind with their dirty feet."

Influence of his family and the West

He criticized many western customs but repeatedly admitted that he learnt sanitation from the west. He wanted to introduce that type of cleanliness in India. Pointing to our unhygienic habits, Gandhiji strongly emphasized observing cleanliness in lavatories, and wrote "I shall have to defend myself on one point, namely, sanitary conveniences. I learnt 35 years ago that a lavatory must be as clean as a drawing-room. I learnt this in the West. I believe that many rules about cleanliness in lavatories are observed more scrupulously in the West than in the East. The cause of many of our diseases is the condition of our lavatories and our bad habit of disposing of excreta anywhere and everywhere. (*Navajivan* on 24 May, 1925).

Scavenging Started from South Africa

Gandhi learnt scavenging in South Africa. His friends there lovingly called him the great scavenger. Mahatma Gandhi said, "Everyone must be his own scavenger." After a three-years stay in South Africa, he returned to India to fetch his wife and sons. Plague had broken out in the Bombay Presidency at that time. There was a chance of it spreading to Rajkot. Gandhi immediately offered his service for improving the sanitation of Rajkot. He inspected every home and stressed the need of keeping the latrines clean. Gandhi suggested the use of two separate buckets for urine and night-soil and that improved the sanitation.

Training of Cleanliness for Equality

During Gandhiji's second trip to India from South Africa, he attended the Congress session in Calcutta to plead the cause of the ill-treated Indians in South Africa. The sanitary condition of the Congress camp was horrible. Some delegates used the veranda in front of their room as latrines, others did not object to it. Gandhi reacted immediately. When he spoke to the avolunteers, they said; "This is not our job, this is a sweeper's job."

Student Project Report

Gandhi asked for a broom and cleaned the filth. He was then dressed in western clothes. The volunteers were astonished but none came forward to assist him. Years later, when Gandhi became the guiding star of the Indian National Congress, volunteers formed a *bhangi* (sweeper) squad in the Congress camps where for once the Brahmins worked as *bhangis*. Two thousand teachers and students were specially trained for doing the scavenging at the Haripura Congress. Gandhi could not think of having a set of people labelled as untouchables for cleaning filth and dirt. He wanted to abolish untouchability from India. Whenever Gandhi got an opportunity to do a little bit of cleaning work, he felt happy. To him the test of a people's standard of cleanliness was the condition of their latrines. He described himself as a *bhangi* and said he would be content if he could die as a sweeper.

Mass Contact Programme

Gandhi's group launched a mass contact programme in the villages. At the end of the morning's march, "a batch of men and women from his party visited the *Harijan* quarters of the village near the camp, taking with them brooms and spades." They talked about the "necessity of sanitation, about keeping their yards clean, of burying rubbish, instead of leaving it to blow here and there. While Gandhi was engaged in talks, people who had accompanied him would begin cleaning up the *basti* themselves. They highlighted the need to prevent excrement lying in the open, as it attracted flies and spread disease.

Responsibility of People towards Cleanliness to protect the Environment

1. Gandhiji said, "So long as you do not take the broom and the bucket in your hands, you cannot make your towns and cities clean."
2. When he inspected a model school, he told the teachers: "You will make your institution ideal, if besides giving the students literary education, you have made cooks and sweepers of them."

Student Project Report

A Polite survey on Sanitation Facilities and its Operational Problems: Emagarni and Gawani Villeges of Chikodi Taluka of Belagavi District.

3. To the students his advice was, "If you become your own scavengers, you will make your surroundings clean. It needs no less courage to become an expert scavenger than to win a Victoria Cross."
4. The villagers near his ashram refused to cover excreta with earth. They said: "Surely this is *bhangi's* work. Gandhi personally supervised the scavenging work in villages. To set an example, he for some months, himself used to go to the villages with a bucket and a broom. Friends and guests went with him. They brought bucketfuls of dirt and stool and buried them in pits.
5. The sight of a *bhangi* carrying a night-soil basket on his/her head made him sick. He explained how with the use of proper instruments, cleaning could be done neatly. Scavenging is a fine art and he did it without becoming filthy himself.

Relevance of Gandhian views on Sanitation in Modern days

The sanitation is relevant to India in general and rural areas in particular for the following reasons

1. At global growth Sanario MDG and SDG made the Sanitation and heath on an indicator assessment of growth.
2. Since independence govt of India has given priority to sanitation, health and human development in policy frame work
3. The secretary of Sanitation said that revolution in rural India.
4. Toilet constriction is mandatory for each HH and ration card holders at village level.
5. Swach Bharat Mission was launched on October 2nd 2014.
6. The trends in the constriction of toilets in India achieved by coveting 98.4% villages. But in spite of the sanitation revelation in Indian the real operation of toilets or govt. achieved the targeted objective.

Student Project Report

A Polite survey on Sanitation Facilities and its Operational Problems: Emagarni and Gawarni Villeges of Chikodi Taluka of Belagavi District.

Construction of IHHL is one of the programes which has achieves its target by covering 98.8% and declaring ODF Free villages, districts and states .but practically still villages are choosing open defecation .it made government it is need to take Pre infrastructure of the optimum operation of toilets and creating awareness among the awareness of the sanitations among the stake holders.

 Time : 12.30-1.30
 Seminar Guide : Prof. B M Hiremath

RATIO ANALYSIS

Introduction:
 The financial statements such as the Profit and Loss Account and Balance Sheet, disclose only trading results and financial position of a firm for a particular period.
 These statements fail to give full and complete picture of the financial position of a firm. There is need of applying certain tools for assessing accurately the financial health of a firm.
 Ratio Analysis is the powerful tool applied for measuring financial soundness and performance of a firm.

Definition:
 Ratio Analysis is the process of identifying the financial strengths and weakness of the enterprise by establishing relationship logically between the items of Balance Sheet & / or Profit and Loss Account (Income Statement) or both and interpreting the results to derive meaningful conclusions.
 A Ratio is a mathematical expression of a quantitative relationship between two items or group of items having mutual cause and effect relationship used for a decision making.

TYPES OF RATIOS

1. Liquidity Ratios:
 - a. Current Ratio
 - b. Quick Ratio
 - c. Absolute Ratios or Super quick Ratio
 - d. Debt Service Coverage Ratio
 - e. Dividend Coverage Ratio

2. Solvency Ratios:

- a. Debt Equity Ratio
- b. Proprietary Ratio
- c. Capital Gearing Ratio
- d. Fixed Assets Ratio
- e. Interest Coverage Ratio
- f. Current Assets Ratio
- g. Fixed Assets Ratio
- h. Total Assets Ratio

3. Efficiency Ratios or Activity Ratios:

- a. Turnover Ratio
- b. Stock Turnover Ratio
- c. Debtors Turnover Ratio
- d. Creditors Turnover Ratio
- e. Working Capital Ratio
- f. Earning Per Share
- g. Price Earning Ratio
- h. Return on Equity Shareholders Fund
- i. Return on Shareholders Fund
- j. Returns on Total Assets

4. Profitability Ratios:

- a. Gross Profit Ratio
- b. Net Profit Ratio
- c. Operating Ratio
- d. Operating Profit Ratio
- e. Return Over Investment

1. LIQUIDITY RATIOS:

Liquidity ratios play a key role in the analysis of short-term solvency of a firm. The term liquidity refers to the ability of the firm to pay in cash its outstanding short-term obligations. To judge the liquidity of a firm following ratios are examined

a). Current Ratio:

Current Ratio means the ratio of current assets to current liabilities. It indicates the relationship between current assets and current liabilities. It is also called as working capital ratio.

$$\text{Current Ratio} = \frac{\text{Current assets}}{\text{Current liabilities}}$$

Current Assets:

Those assets which can be converted in to cash within a year are current assets. They include *Cash in hand and at bank, sundry debtors, bills receivable, stock, marketable securities, prepaid expenses, outstanding incomes etc.* except Loose tools

Current Liabilities:

Those liabilities that are payable within a year. They include *sundry creditors, bills payable, bank overdraft, outstanding expenses, provision for taxation etc.*

A current ratio of 2:1 is considered to be ideal. It means current assets should be twice of current liability to provide for sufficient working capital after meeting current liabilities. A very high ratio is also not desirable as it indicates less efficient use of funds.

B). QUICK RATIO / LIQUID RATIO / ACID TEST RATIO:

It is the ratio of liquid assets to liquid liabilities. The assets which are immediately convertible into cash are called liquid assets. All current assets except stock and prepaid expenses are treated as liquid assets. All liabilities except bank overdraft are considered as liquid liabilities.

$$\text{Liquid Ratio} = \frac{\text{Liquid assets}}{\text{Liquid liabilities}}$$

A liquid ratio of 1:1 indicates highly solvent financial position of the firm. The ratio is used as supplementary to current ratio in analysing liquidity.

C). ABSOLUTE LIQUIDITY RATIO / SUPER QUICK RATIO:

It is the ratio of absolute liquid assets to liquid liabilities. It is also called as Cash Position Ratio or Cash Ratio.

Absolute Liquid Ratio

$$= \frac{\text{Absolute Liquid assets}}{\text{Liquid liabilities}}$$

Absolute liquid assets include cash in hand, cash at bank and short term or temporary investments or marketable securities.

The ideal absolute liquid ratio is taken as 1:2. This ratio gains much significance only when it is used along with first two ratios. However it is not widely used in practice.

o **Significance:**

- It is most vigorous measure of liquidity position of a firm.
- It discloses real liquidity position of a firm.

2. Solvency Ratios:

The ratios are used in analysing long term solvency of a firm. These ratios indicate the pattern of financing i.e. whether long term requirements have been met out of long-term funds or not. The important ratios used for analysis of long-term solvency of a firm are as follows:

a. **Debt Equity Ratio:**

This ratio indicates the relationship between borrowed funds (debt) and owners' funds (equity). It is determined to measure the firm's debt in the business. This is also called as external and internal equity ratio. It is calculated by applying the following formula.

Debt Equity Ratio $\frac{\text{External Equities (Borrowed Fund)}}{\text{Internal Equities}}$

The external equity refers to total outside liabilities. The outside liabilities include all debts, whether long-term or short-term. The internal equity includes preference share capital, equity share capital, reserves and surplus.

If debt-equity ratio is to be calculated as long-term financial ratio, it may be calculated by using the following formulas.

i). Debt-Equity Ratio = $\frac{\text{Total Long-term Debts}}{\text{Total long-term funds}}$

ii). Debt Equity Ratio = $\frac{\text{Total Long-term Debt}}{\text{Shareholders fund}}$

Second method is popular and widely used in practice. A debt-equity ratio of 1:1 is considered as ideal.

- Long term debt = Debentures + Other long term loans
- Shareholders' funds = Preference capital + Equity capital + Reserves & Surplus - Goodwill - Preliminary expenses

Significance:

- It helps to identify the proportion of shareholders' stake in the business.
- It indicates the extent to which the firm depends upon outside for its existence.
- It warns that too much dependence on outside funds is dangerous.

b. Proprietary Ratio:

It is the ratio of proprietor's funds (shareholders funds) to tangible assets.

$$\text{Proprietary Ratio} = \frac{\text{Shareholders Fund}}{\text{Total Tangible Assets}}$$

- Shareholders funds include preference share capital, equity share capital, all reserves & surplus less goodwill and preliminary expenses.
- Total tangible assets include all assets except goodwill and preliminary expenses.

Significance:

- a. It shows long term or future solvency position of the business.
- b. It throws light on general financial strength of a firm.
- c. It tests soundness of capital structure.
- d. It helps the creditors to find out proportion of shareholders funds in the total assets employed in the business.
- e. Very high ratio indicates relatively lesser risk to the creditors and vice-versa. A ratio of 50% is considered safe for creditors.

Thanking
you

Seminar Topic : Company Final Accounts
 Name : PRIYANKA A GIRI
 Class : B.Com III Sem
 Date : 07/11/2017
 Time : 9.15-10.15 am
 Seminar Guide : Prof. B M Hiremath

Company Final Accounts

- Financial statements are the basic and formal annual reports through which the corporate management communicates financial information to its owners and various other external parties which include investors, tax authorities, government, employees, etc. These normally refer to: (a) the balance sheet (position statement) as at the end of accounting period, and (b) the statement of profit and loss of a company. Now-a-days, the cash flow statement is also taken as an integral component of the financial statements of a company.

Nature of Financial Statements

The following points explain the nature of financial statements:

1. Recorded Facts: Financial statements are prepared on the basis of facts in the form of cost data recorded in accounting books. The original cost or historical cost is the basis of recording transactions. The figures of various accounts such as cash in hand, cash at bank, trade receivables, fixed assets, etc., are taken as per the figures recorded in the accounting books. The assets purchased at different times and at different prices are put together and shown at costs. As these are not based on market prices, the financial statements do not show current financial condition of the concern.
2. Accounting Conventions: Certain accounting conventions are followed while preparing financial statements. The convention of valuing inventory at cost or market price, whichever is lower, is followed. The valuing of assets at cost less depreciation principle for balance sheet purposes is followed.

3. Postulates: Financial statements are prepared on certain basic assumptions (pre-requisites) known as postulates such as going concern postulate, money measurement postulate, realisation postulate, etc. Going concern postulate assumes that the enterprise is treated as a going concern and exists for a longer period of time. So the assets are shown on historical cost basis. Money measurement postulate assumes that the value of money will remain the same in different periods.

4. Personal Judgements: Under more than one circumstance, facts and figures presented through financial statements are based on personal opinion, estimates and judgements. The depreciation is provided taking into consideration the useful economic life of fixed assets. Provisions for doubtful debts are made on estimates and personal judgements. In valuing inventory, cost or market value, whichever is less is being followed. While deciding either cost of inventory or market value of inventory, many personal judgements are to be made based on certain considerations. Personal opinion, judgements and estimates are made while preparing the financial statements to avoid any possibility of over statement of assets and liabilities, income and expenditure, keeping in mind the convention of conservatism

Seminar Topic : Role of MNC's
 Name : Pranav Nerlikar
 Class : M.Com II Sem
 Date : 04/04/2018
 Time : 12.30 pm
 Seminar Guide : Prof. P R Kamate

MNC's

- **Multinational** corporations are those large firms which are incorporated in one country but which own, control or manage production and distribution facilities in several countries. ... They transact business in a large number of countries and often operate in diversified business activities.

Role of Multinational Corporations in the India Economy:

- Prior to 1991, multinational companies did not play much role in the Indian economy. In the pre-reform period the Indian economy was dominated by public enterprises. To prevent concentration of economic power the Industrial Policy 1956 did not allow the private firms to grow in size beyond a point. By definition multinational companies are quite big and operate in several countries.

- While multinational companies played a significant role in the promotion of growth and trade in South- East Asian countries they did not play much role in the Indian economy where import-substitution development strategy was followed.

1. Promotion of Foreign Investment:

- In the recent years, external assistance to developing countries has been declining. This is because the donor developed countries have not been willing to part with a larger proportion of their GDP as assistance to developing countries. MNCs can bridge the gap between the requirements of foreign capital for increasing foreign investment in India. The liberalised foreign investment pursued since 1991 allows MNCs to make investment in India subject to different ceilings fixed for different industries or projects.

2. Non-Debt Creating Capital Inflows:

- In pre-reform period in India when foreign direct investment by MNCs was discouraged, we relied heavily on external commercial borrowing (ECB) which was of debt-creating capital inflows. This raised the burden of external debt and debt service payments reached the alarming figure of 35 per cent of our current account receipts. This created doubts about our ability to fulfill our debt obligations and there was a flight of capital from India and this resulted in balance of payments crisis in 1991.

3. Encouragement to Inessential Consumption:

- The investment by multinational companies leads to overall increase in investment in India but it is alleged that they encourage conspicuous consumption in the economy.

4. Import of Obsolete Technology:

- Another criticism of MNCs is based on the ground that they import obsolete machines and technology. Some of the imported technologies are inappropriate to the conditions of Indian economy. It is alleged that India has been made a dumping ground for obsolete technology.

5. Setting up Environment-Polluting Industries:

- It has been found that investment by multinational corporations in developing countries such as India is usually made for capturing domestic markets rather than for export promotion. Moreover, in order to evade strict environment control measures in their home countries they set up polluting industrial units in India.

6. Volatility in Exchange Rate:

- Another major consequence of liberalised foreign investment by multinational corporations is its impact on the foreign exchange rate of the host country. Foreign capital inflows affect the foreign exchange rate of the Indian rupee.

$$\Rightarrow \rho(A) = 3$$

Q. No 2: Q.1: There is a triangle of perimeter 80 cm and from that square of perimeter 20 cm is removed as shown in the following fig. find the perimeter of remaining fig.

Ans: 90 cm

Perimeter of $\triangle = 80 \text{ cm}$

Perimeter of square = 20 cm

$$4a = 20 \text{ cm}$$

\therefore perimeter of $\triangle = a$

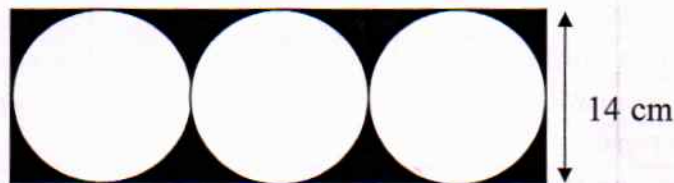

$$80 - 5 = 75 \text{ cm}$$

Q.No 2: If A is set of all students in GIB college Nipani, and R is relation "is friend of" then is it reflexive, symmetric and transitive? Justify ur answer.

Ans:

Reflexive: every fr students are friend of himself/herself.
 $\Rightarrow R$ is reflexive.

Symmetric: If student A is friend of B then B also friend of A.
 $\Rightarrow R$ is symmetric.

Transitive: If A is friend of B & B is friend of C then, it is not always possible A is friend of C.
 $\Rightarrow R$ is not transitive.

Q.No 2. If sum of three continuous dates in calendar is 51 then find the dates.

Ans:

Let one date be x and other two consecutive dates will be $x+1$ and $x+2$.

WKT, sum of 3 dates is 51.

$$\therefore x + x + 1 + x + 2 = 51$$

$$3x + 3 = 51$$

$$3x = 48$$

$$x = 16$$

$$\therefore x = 16, x + 1 = 17, x + 2 = 18$$

Let $x, x+7, x+14$ be 3 dates

$$x + x + 7 + x + 14 = 51$$

$$3x + 21 = 51$$

$$3x = 30 \therefore x = 10$$

SEMINAR

NAME: Anjum Mujavar

TOPIC: Electronic Transition

CLASS: B.Sc. II Sem DIV: _____

ROLL NO: 6

GUIDED BY: Dr. A.S. Jaganmure

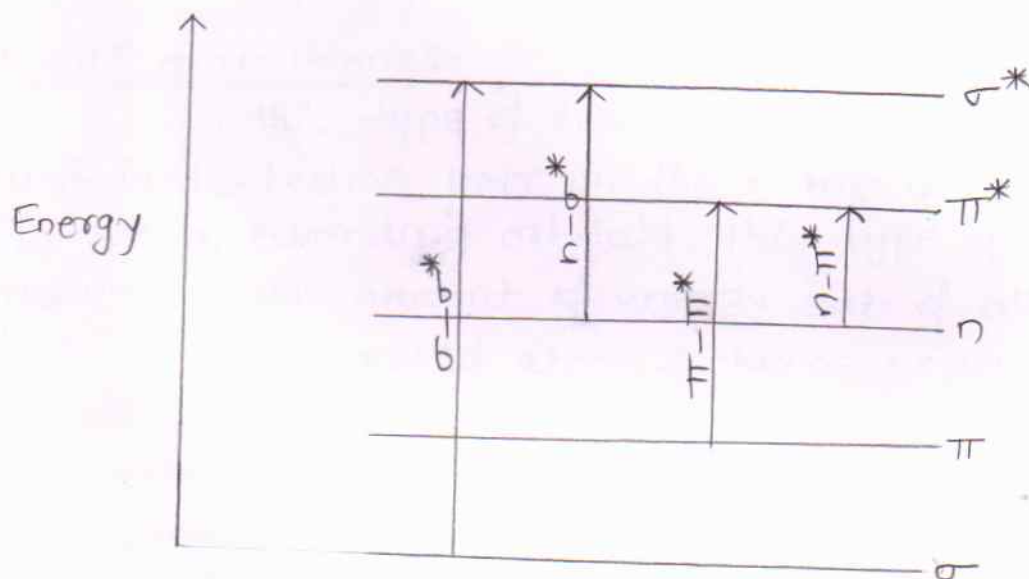

Dr. S.B. Solbannavar

DATE: 13/02/2017

* Electronic transition in the molecule:-

When a molecule absorbs energy in the visible or UV region, an electron in the molecular orbital is excited to higher energy. The possible transitions of the electron between molecular orbitals are:

- 1) $\sigma - \sigma^*$ transition.
- 2) $n - \sigma^*$ transition.
- 3) $\pi - \pi^*$ transition.
- 4) $n - \pi^*$ transition.

1. $\sigma - \sigma^*$ transitions:-

It is a high energy process since σ bonds are in generally very strong. The organic compounds in which all the valence shell electrons are involved in the formation of σ -bond do not show absorption in UV-region (180-400nm). For saturated hydrocarbons CH_4 , propane, etc 150nm.

2. $n - \sigma^*$ transitions:-

This type of transition takes place in saturated compounds containing one hetero atom with unshared pair of electrons. Some compounds undergoing the type of transition are halides, alcohols, ethers, aldehydes, amines, etc.

3. π - π^* transitions:-

This type of transition occurs in the unsaturated centres of the molecule. i.e. in compounds containing double π or triple bonds & also in aromatics. The excitation of π -electrons requires small energy & hence transition of this type occurs at longer wavelength. A π -electron of the double bond is excited to π^* orbital.

Ex:- alkenes, alkynes, carbonyl compounds.

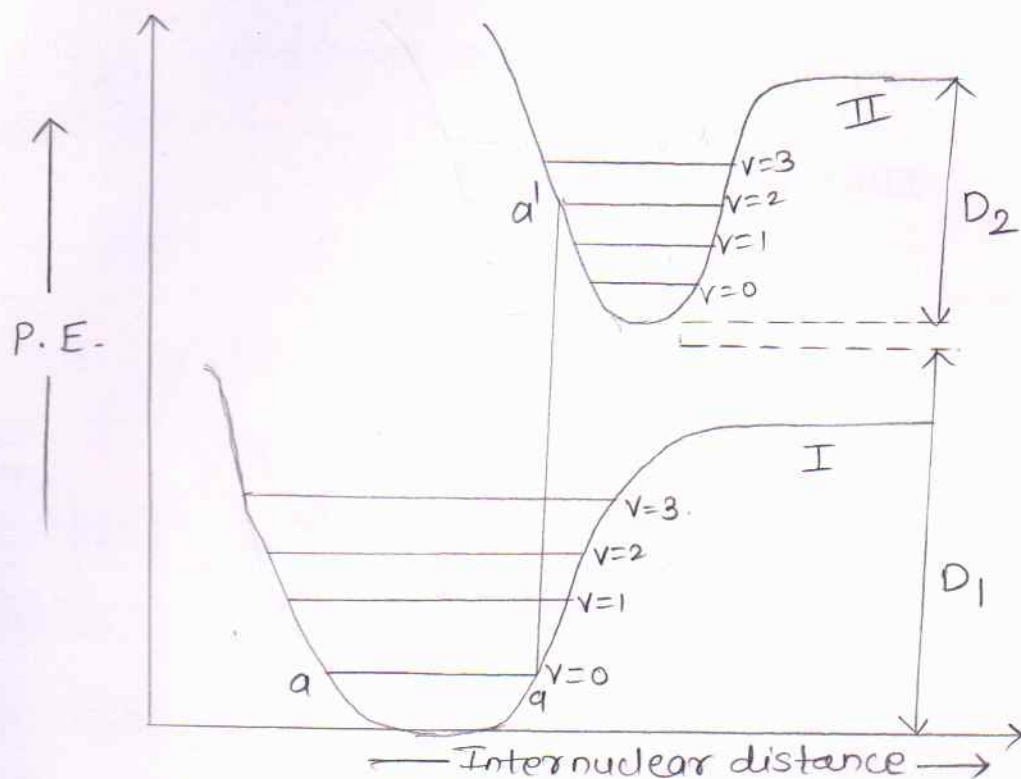

4. n - π^* transitions:-

In this type of transition, an electron of unshared electron pair on the hetero atom gets excited to π^* antibonding orbitals. This type of transition requires least amount of energy out of all the transitions discussed above & hence occurs at longer wavelengths.

Ex:- --N=O , >C=N , >C=O , shows this type of transitions & the absorption maxima are obtained at a wavelength longer than 280 nm.

* Frank-Condon Principle:-

Frank-Condon principle states that, "the time required for an electronic transition to occur is so short (10^{-16} s) as compared to the time of vibration (10^{-13} sec) that the inter nuclear distance in the molecule hardly changes during electronic transition."

Every electronic transitions has its own potential energy curves. Two such curves for lower transition electronic states are shown in above fig. by I & II resp. They are differ in the fact that the minimum of the potential curve for the excited state (II) is at a larger internuclear distance than the ground state (I). The dissociation energies for the two states are different. i.e. $D_2 < D_1$. This is evident due to the fact that the bonding in the excited state is weaker than in ground state. The vertical distance betⁿ the minima of the two curves gives the difference betⁿ electronic energy of the two states.

The transition between two electronic states takes place according to the Frank-Condon principle. An electronic transition takes place from an extreme end of vibrational level because the velocity of the atoms is zero at these positions & they spend maximum time at these place. Further e^- moves faster than the nuclei. The electronic transition takes place before the nuclei oscillates to change their internuclear distance.

Financial Management

Introduction:

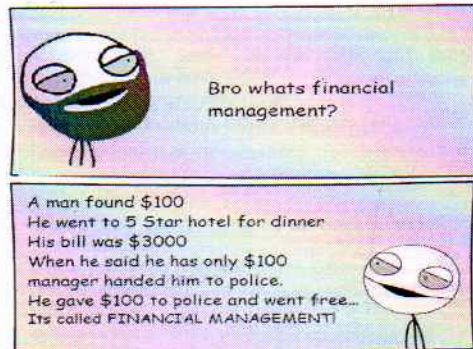

In our present day economy, finance is defined as the provision of money at the time it is required. Every enterprise, whether big or small, needs finance to carry on its operations and to achieve its targets.

In fact, finance is so indispensable today that it is rightly said to be the lifeblood of an enterprise. Without adequate finance, no enterprise can possibly accomplish its objectives.

Finance has become so much important for every business enterprise that all managerial activities are connected with it.

Finance deals with inflow and out flow of cash with rapid growth of complex industrial structure.

The importance of financial function has increased so that it has given birth to a separate subject known as "Financial Management".

Meaning:

Financial Management is the part of the management activity which is concerned with the planning and controlling of firm's financial resources. It deals with finding out various sources for raising funds for the firm. The sources must be suitable and economical for the needs of the business.

The proper use of funds also forms a part of financial management. Financial management is recent origin. This subject is still developing and has not yet acquired a body of knowledge of its own.

Financial Management is that specialised function of general management which is related to the procurement of finance and its effective utilisation for the achievement of common goal of the organisation.

Definitions:

Prof. Ezre Soloman: "Financial Management is concerned with the efficient use of an important economic resource, namely capital funds."

J. F. Bradley: "Financial Management is the area of business management devoted to judicious use of capital and careful selections of sources of capital in order to enable a business firm to move in the direction of reaching its goals."

Howard and Upton: "It is the application of general managerial principles to the area of financial decision making".

From the above definitions it is clear that financial management is that specialized activity which is concerned with the collection or raising of finance and its effective utilization for the attainment of common objectives of the business enterprise.

It includes financial planning, financial administration and financial control. In short, financial management is mainly concerned with the proper management of funds.

Functions of Financial Management:

Following are the important functions of Financial Management

According to the modern approach of financial management the scope and functions of financial management has changed from mere raising of funds to financial decision making process leading to wise use of funds.

For the sake of convenience functions may be broadly classified into two categories such as executive functions and incidental functions.

I. Executive Functions:

- a. **Financial Forecasting:**
- b. **Raising of Funds:**
- c. **Managing Flow of Funds:**
- d. **Cost Control:**
- e. **Allocation of Net Profit or Management of Income:**
- f. **Analysis and Appraisal of Financial Performance:**

II. Routine of Incidental Functions: These functions mainly comprise the work of routine nature which is necessary for the execution of financial decisions at the executive level. Some of the important routine functions are as follows:

- a. Record keeping and reporting
- b. Preparation of various financial statements
- c. Cash planning and management
- d. Credit management i.e. negotiations with banks and financial institutions.
- e. Custody and safeguarding the different financial securities etc.
- f. Providing top management with information on current and prospective financial conditions of the business.
- g. To keep track of stock exchange quotations and behaviour of stock market prices.

Thus, from the above discussion it can be concluded that, the financial manager is not only responsible for maintaining financial health of the organisation but also increase the economic welfare of the shareholders by utilizing the funds in an effective manner.

Political And Legal Environment :

> Introduction :-

Environment refers to external forces that have impact on a bearing on the functioning of Business.

A variety of environmental forces influence a company's marketing system. Firm which systematically analyse and diagnose the environment are more effective than those which don't. It is the responsibility of marketing manager to change the company's policies along with the changing environment.

According to Philip Kotler, "A company's marketing environment consists of the internal factors and forces, which affect the company's ability to develop and maintain successful transaction and relationship with the company's target customer".

The firm must monitor six major forces in the broad environment : viz,

Demographic, Economic, Socio-cultural, natural, technological and political and legal environment. The interaction among these environment will lead to new opportunities and threats. They are interrelated to each other:

* Example :

Explosive population growth (demographic) leads to more resource depletion and pollution (natural), which leads consumers to call for more laws (political system-legal), which stimulate new technological solution and products (Technological) that, if they are affordable (economic), may actually change attitude and behaviour (social-cultural environment).

In this way the different environments types related to each other. At last, Environment decides the fate of organisation.

* * *

To day we are dealing with Political and Legal Environment :

* Meaning :-

Political Environment refers to the influence exerted by the three political institutions viz., legislature, executive and the judiciary in shaping, directing, developing and controlling business activities.

Political and legal environment consist of laws, government agencies and pressure groups that impact organisations and individuals.

The political and legal environment provides a framework within which the business is to function and its existence depends upon the success with which it can face the various changes / challenges constructed out of legal and political framework.

Some of the important factors and influences operating in political environment are :

1. Political system and its features like nature of the political system, ideological forces, political parties and centres of power.
2. The political structure, its goals and stability.
3. Political philosophy, government's role in business, its policies and interventions in economic and business development.
4. Political processes like operation of the party system, elections, funding of elections, formation of government and legislation with respect to economic and industrial promotion and regulation.

There are three important elements in political-legal environment. These elements are as follows :

1. Government :

A business is highly guided and controlled by government policy. Hence the type of government running a country is a powerful influence on any business.

The government refers to the centre of political authority having the power to govern those it serves. Government is that institution by which men everywhere seek to order society, that is, to control the structure and functioning of society.

The business firm have a number of responsibilities to the government. The business firm must obey the laws of central, state and local governments. It should look to the govt. for support, sustenance, encouragement and guidance.

> Example : Tax payment, Voluntary programmes by withholding amount from wages and salaries of employees for purchase of National saving certificates.

On the otherhand Government also have some responsibilities to business:

- * Establishment and enforcement of laws under which the business function.
- * Maintenance of order: maintaining order and protecting person and property.
- * Money and credit: Regulate money and credit and protect integrity of rupee to guard against rapid fall in its value.
- * Infrastructure: Government facilitates infrastructure facilities like transportation, power, finance, trained personnel and civic amenities.
- * Tariffs and Quotas: These are used by government to protect the business from foreign competition.
Incentives and subsidies are granted by the govt. to encourage the development of home industries.

2. Legal:

Business organisations prefer to operate in a country where there is a sound legal system.

Legislature (legal system) is most powerful political institution vested with such power as policy making, law making, budget, approving, executive control and acting as mirror of public opinion. It decide such vital aspects as the types of business activities the country should have, who should own them, what should be their size of operations, what should happens to their earnings and other related factors.

However, in any country, businesses must have a good-working knowledge of the major laws protecting consumers, competition and organisations.

3. Political:

Apart from Government and legal factors there are several other political pressures that influence and limit organisations. Political system prevailing in the country decide, promotes, fosters, encourages, shelter, directs and controls the business activities^{of that country}. A political system which is stable, honest, efficient and dynamic and which ensure political participation of the people and assures personal security to the citizens. Is a primary factor for economic development.

There are two basic political philosophies are in existence all over the world viz., democracy and totalitarianism.

In totalitarianism, also called as authoritarianism, individual freedom is completely subordinated to the power of authority of the state and concentrated in the hands of one person or in a small group which is not constitutionally accountable to the people.

on the other hand, Democracy refers to a political-philosophy / arrangement in which supreme power is vested in the people. It requires every citizen to take part in governance. It exists when leader, elected by people, do the ruling.

The political system of the govt. should be efficient and dynamic besides being stable. stability is an important for economic development but at the same time political instability can ruin (destroy) an economy. ^{Ex.} It has been demonstrated in Italy. Italy holds a record in political instability. In the 63 years since II world war, the country has had 63 governments. This political instability is responsible for very low growth rate in the economy.

* Critical factors of political environment :

The following are the factors which plays crucial role in determining the political environment of the business.

* Government Ideology :

Over a period of time, many political thinkers have explained a variety of political ideologies. In a democratic country, like India, the ideology of the ruling party influences ownership, management structure and size of business. The rightist ideology of a ruling party may formulate liberal business policies, whereas a leftist view of a ruling party will favour socialism and develop measures like nationalisation and excessive centralisation.

Earlier, the Indian government favoured progressive income tax policies and opposed unregulated business and finance activities. But in recent times, they followed centrist economic and social-democratic agenda. But, today our ruling party focuses on neo-liberal policies which include social liberalism, secularism and free enterprise system with govt. regulations.

Under the regime of Mr. P.V. Narasimham Rao and then finance minister Dr. Manmohan Singh, significant economic reforms were introduced and more stress was given on "efficiency" rather than "equity". These regimes affected the day to day operations of public enterprises.

Ex: In 1991 congress with its alliance introduced New Economic policy in which they welcome the idea of privatisation and liberalisation which was discontinued by the BJP government under the leadership of then prime minister Shri. Atal Bihari Vajpayee. However, in 2004, privatisation was re-implemented with the emergence of congress party.

* Bureaucracy :

Bureaucracy and excessive regulation are commonly known as red tape. It includes all kinds of rules, paperwork, permits, taxes, procedures or requirements which can be crucial when setting up a company or doing business in a particular country.

* Pressure Groups:

These may be an organisations or group of organisation that attempt to influence the way of doing business to secure the concern of their members and supporters. Unlike the stakeholders, they do not have any interest in the organisation. They may have any reason such as environmental issues, social issue etc.

* Corruption level :

Corruption may be explained as the misuse of entrusted power for personal advances. Corruption certainly causes a degraded business environment when the public trust is put at risk. Corruption could be in various forms that can include graft, bribery, embezzlement and extortion.

* Legal Environment :

The government, in every country, regulates the business according to its defined priorities. Legal system of a country is framed by the government. The laws which are passed by the government for business operation is called legal environment. In every country, the government regulates business activities.

These regulations of governments are considered as legal environment. In practice legal and regulatory goes hand in hand. The limits for business operations are decided by regulatory environment and this is also called legal environment.

Business laws are numerous in number and various in forms. The laws are enacted to protect the business interests of various groups in society. The laws are needed to protect consumers, workers, managers, owners, shareholders and society at large.

Laws or business legislations such as MRTP, FERA, IRDA etc. The balance in growth is maintained in the economy through ~~these~~ above said legislations. Laws are not only meant to protect the business but sometimes it also create opportunities for the business. For example :

1) In tax law, there are different tax incentives and privileges which provides opportunities to a business firm to enter new areas.

2) Mandatory recycling laws have boosted the recycling industry and launched dozens of new companies making new products from recycled materials.

Business legislation is intended to protect companies from unfair competition, protect consumers from unfair business practices, protect society from unbridled (uncontrolled) business behaviour, and charge businesses with the social costs of their products or production processes.

Following are some of the government Acts & government policies relating to legal environment for business operations:

- * The sale of Goods Act, 1930.
- + Indian Companies Act, 1956
- + Income Tax Act, 1961
- * The consumer Protection Act, 1986.
- + Environment Protection Act, 1986.
- + The weight and measurement Act, 1958.
- * FEMA Act-1999.
- * MRTP Act 1969 replaced by competition Act 2002.
- * Essential Commodities Act 1955.

Govt. also have various rules and restriction on -
machinery procurement i.e. import of goods licence, opening of LC -
with bank, customer credit. For financing, purchasing, marketing the
govt. has various law to conduct business lawfully and effectively.

> Conclusion :

In this way, the political and legal environment -
have impact on marketing activities of business. The failure of -
market invites govt. intervention in an economy. The market like
monopolistic or competitive monopoly lead to the wastage of reso-
-uces, exploitation of consumer. Avoidance of these will main reason -
for state intervention through various laws.

TIDAL WAVES

The tides in the sea are the result of the universal gravitational effect of heavenly bodies like sun and moon on the earth. Due to fluidity of water mass, the effect of this force becomes apparent in the motion of water, which shows a periodic rise and fall in levels which is in rhythm with the daily cycle of rising and setting of sun and moon. This periodic rise and fall of the water level of sea is called tide. These tides can be used to produce electrical power which is known as tidal power.

To harness the tides, a dam would be built, across the mouth of the bay. It will have large gates in it and also low head hydraulic reversible turbines are installed in it. A tidal basin is formed, which gets separated from the sea, by dam. The difference in water level is obtained between the basin and sea. The constructed basin is filled during high tide and emptied during low tide passing through sluices turbine respectively.

This principle is explained in fig. By using reversible water turbines, turbine can be run continuously, both during high tide and low tide.

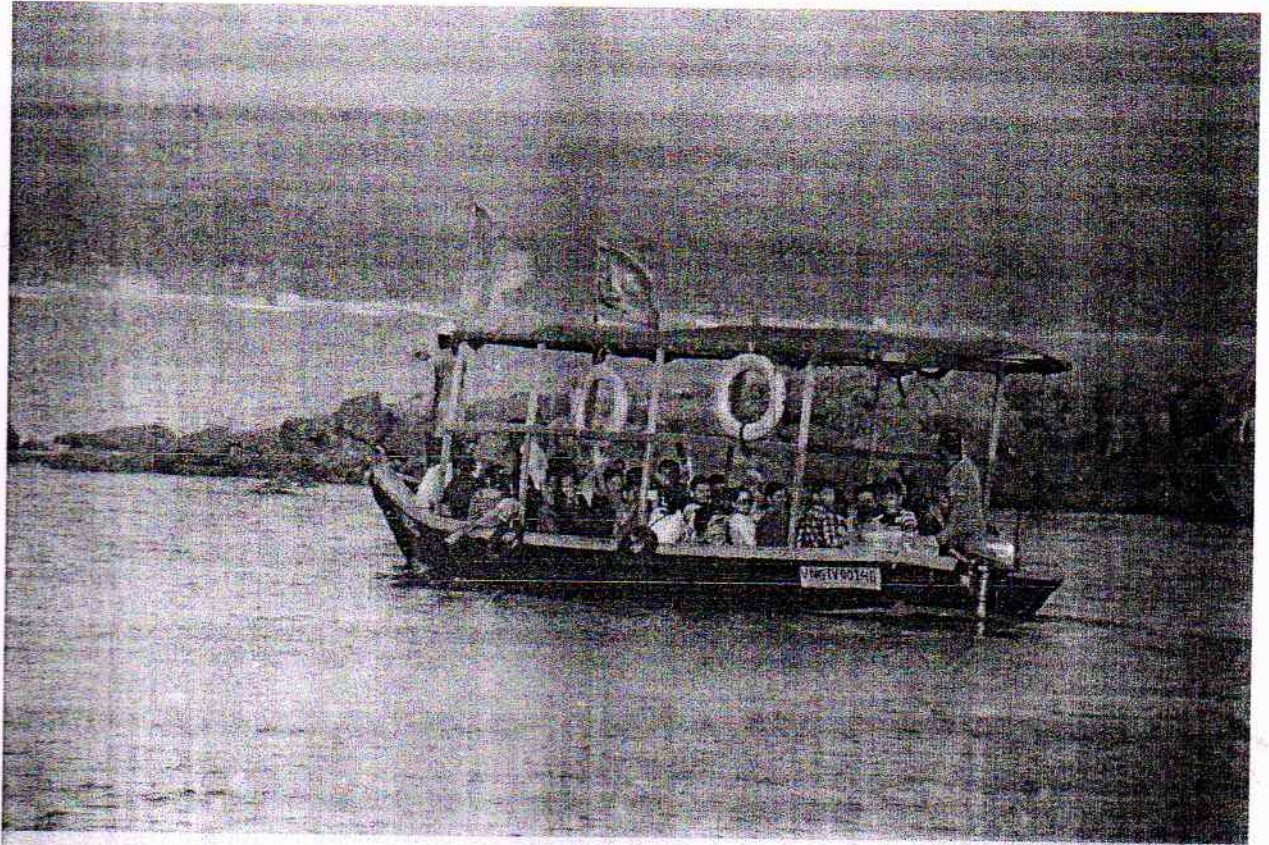

The turbine is coupled to generator, potential energy of the water stored in the basin, as well as energy during high tide, is used to drive the turbine, which is coupled to generating electricity. This arrangement of harnessing tidal energy, is known as ~~to~~ single basin plant.

An estimate of the rate of tidal energy dissipation for the world is about 3×10^6 MW. The first commercial tidal power station in the world was constructed in France in 1965 across the mouth of the LA RANCE estuary. It has a capacity of 240 MW. In India, tidal power could probably be generated in KUTCH and in the HOOGHLY River.

A tidal power plant has been completed at RANCE in France with rating of 240 MW in 1966. It works on single basin, two way system with pumping. Substantial sources of this form of energy are known to exist in U.S.A, Japan, USSR, New Zealand, Italy, and Mexico and India.
